Plan for Change: New icon for Microsoft Intune

🗄 Archive   ↪ Share   🔗 Copy link   ✉ Mark as unread

We are excited to announce a new icon for Microsoft Intune, which will be updated across all platforms and apps associated with Intune such as the Intune admin center and Intune Company Portal app. This change aims to provide a fresh and modern look to enhance user experience. The rollout of the new icon will begin in late April 2025 and will be gradually implemented over the next few months.

View image in new tab

How this will affect your organization:

There is no impact on your organization's operations. Admins will see the updated icon in the Intune admin center, Intune for Education portal, Azure portal and more. Users will simply see the updated icon for the Microsoft Intune and Intune Company Portal apps.

What you need to do to prepare:

Update your documentation to reflect the new icon (above) and notify users about this change as needed.

Do you like this change?   👍 👎

Enhanced inventory ja Multi device query

Panu Saukko, Ninja

Enhanced inventory

Uusi policy, jolla määritetään kerättävät tiedot

Resource explorer näyttää kerätyt tiedot/kone

Enhanced inventory: nykytila

- Vielä "vähän" kerättäviä asioita
  - Kaikki tiedot enemmän tai vähemmän staattisia
  - Esim. Osion vapaa levytila puuttuu

- Ei tapaa, millä hakea tietoa kaikista konesta (ilman Advanced analytics/Intune Suite)
  - Ei tue Graph-kyselyjä
  - Ei raportteja

- Lupauksia laajemmasta inventoinnista
  - Aikataulu?

- Luvattu myös muille alustoille

Microsoft Intune: Enhanced device inventory for Apple and Android devices

■ □ □ IN DEVELOPMENT

Microsoft Intune

ROLLOUT START
May 2025

Gain more inventory information about your Apple and Android devices.

Roadmap ID	Cloud instances(s)	Platform(s)
473451	Worldwide (Standard Multi-Tenant), GCC, GCC High, DoD	Android, iOS, Mac

Multi Device Query

- **Osa Intune Suiten Advanced Analytics**
- **Ainoa tapa saada tietoa kaikista koneista**
- **KQL-hakuja inventointitietoihin**

Multi device query: nykytila

- Ensimmäinen versio

- Vielä paljon puutteita
  - KQL kielessä puuttuu esim. Render
  - Inventointi pitäisi olla laajempi
  - Vastauksia ei voi hyödyntää

- Luvattu paljon uusia toimintoja
  - Esim Remediationin ajo

Intel and AMD is back in the business ?!?

Petri Paavola, Ninja

Intel ja AMD Copilot+ PCs

- **Intel ja AMD julkisti Copilot+ PC –mallit eli uudet "AI-prosessorit" uusin konemalleihin**
- **Tehoa löytyy**
- **Akkukestoa jopa Qualcomin ARM:n veroisesti, ainakin puheissa ?!?**

- **"Miksi vaihtaa ARM:iin, kun Intel toimii ja tuo nyt uusia ominaisuuksia?"**
- **"Jos ARM-laite maksaa 500e vähemmän ja ostat 1000 laitetta, niin siinä on suuri kustannussäästö?"**

Windows Quick Machine Recovery

Petri Paavola, Ninja

Windows Quick Machine Recovery

- **Windows Resiliency Initiative –tarina sai jatkoa**
- https://techcommunity.microsoft.com/blog/windows-itpro-blog/get-started-with-quick-machine-recovery-in-windows/4398487

- Vikatilanteessa kone käynnistyy/käynnistetään WinRE-ympäristöön ja sieltä WinRE voi hakea netistä turvallisesti korjaavan päivityksen ja palauttaa laitteen takaisin toimivaan tilaan

Introducing quick machine recovery

Quick machine recovery (QMR), part of the Windows Resiliency Initiative announced at Ignite 2024 is now available in the latest Windows Insider Preview build. This feature, when enabled, addresses widespread boot issues on Windows 11 devices by automatically detecting and applying fixes directly from the Windows Recovery Environment (WinRE) thereby reducing the system downtime and manual intervention. When a critical boot failure occurs, the device enters WinRE, connects to the network, and sends diagnostic data to Microsoft, which can then deploy targeted remediations via Windows Update. IT admins are encouraged to enable, customize, or test this feature, which is enabled by default for home users. Windows Insiders can start testing it today and provide feedback via Feedback Hub to refine the feature further. In the Feedback Hub app on your Windows device, **select Recovery and Uninstall > Quick Machine Recovery**. Keep an eye out for a test remediation package coming your way in the next few days, allowing you to experience the quick machine recovery in action.

AzureAD ja MSOnline –moduulit EOL

Petri Paavola, Ninja

AzureAD ja MSOnline –moduulit EOL

- **HoksHoks!**

- **AzureAD ja MSOnline Powershell –moduulit poistuvat käytöstä nyt!**
